Interpretation

The relatively high level of your numerical ability, compared with the lower verbal and abstract results, suggests that you would feel at home with numbers and figures. This would be very useful in many commercial careers. You may not find it so easy to express your ideas on paper.

You should consider the types of career which match this profile, such as general office and stores work; working in accounts, company records, data processing, insurance offices, banks, business administration and so on.

You scored at an average level on both the spatial and mechanical assessments. You seem to have

Preferences

- ✓ Nice Surroundings
- ✓ Non-physical

Regarding workplace, you like the idea of a comfortable, well-equipped building working in a friendly environment alongside others. You don't like the idea of being stuck away on your own in an office and nor do you want to be outside in all weathers. There are many careers with many employers which will provide this combination. You don't have much desire to find work that is largely physical, nor indeed work that is based outdoors. You probably prefer to be in a relatively comfortable environment, working alongside other people.

Personality describes the way we think, feel and behave - in short, it is what makes us unique. When considering careers, we often think about having the right skills and qualifications, but having the right personal qualities can be just as important. Our personality type, and the way we act and behave will influence our suitability for some careers more than others. This profile also informs your career suggestions.
